

SEBO BALANCE A1

With the SEBO BALANCE A1, SEBO heralds a new era: Our cordless vacuum cleaner for all floors and surfaces combines decades of experience with state-of-the-art technology.

Optimised by German design and engineering, the SEBO BALANCE A1 is ergonomic, lightweight and versatile and is ideal for effective everyday vacuuming.

POWERFUL - The innovative cyclone technology combined with a powerful digital brushless motor of over 100,000 RPM, provides highly efficient cleaning.

LIGHTWEIGHT - At only 2.3kg, the lightweight and ergonomic design of the BALANCE A1 ensures effortless cleaning and maximum convenience on floors, stairs, or hard-to-reach areas.

LONG BATTERY LIFE - Thanks to its powerful battery, you can enjoy up to 48 minutes* of uninterrupted runtime. Maximum flexibility and efficiency, exactly when you need it.

INNOVATION - The SEBO Power Brush provides excellent pick up on carpet and hard floor with Anti-Hair Wrap, LED Search Lights and Safety Shut-Off.

QUIET - With an extremely low noise level of just 70 dB*, the BALANCE A1 is quiet, despite its power, making it ideal for households with children, pets or sensitive ears.

* Depends on usage and conditions. Measured on power level 1 with power brush fitted.

Motor Power

400W

Battery Capacity

64.75Wh

Weight

2.3kg

Bin Volume

0.38L

Maximum Runtime

48min

Noise Level

70-77dB

Height

118cm

Depth

21.5cm

Width

24cm

Innovative SEBO cyclone technology

At the heart of the BALANCE A1 is a multi-stage cyclone system using powerful centrifugal forces to separate even the smallest dirt particles from the air. The first stage is the main cyclone which removes larger debris, followed by six downstream mini-cyclones which filter out fine particles. This cyclonic separation prevents dust reaching the main filter, which increases the service life of the filters and the machine.

High-quality microfiltration

The first part of the BALANCE's filtration system is the cyclonic separation which removes almost all fine particles before the air reaches the Motor Protection Filter. The main purpose of this filter is to prevent dust entering the motor and reducing its service life. Any dust which does get trapped by the filter can be rinsed out with clean water and once the filter is completely dry, it can be used again. The final stage of the filtration process is the Micro Hygiene Filter which ensures only pure air which meets the EPA10 standard is emitted by the vacuum cleaner.

Smart LED display

The LED display shows the battery charge level precisely as a percentage and enables easy adjustment of the power level using the integrated buttons.

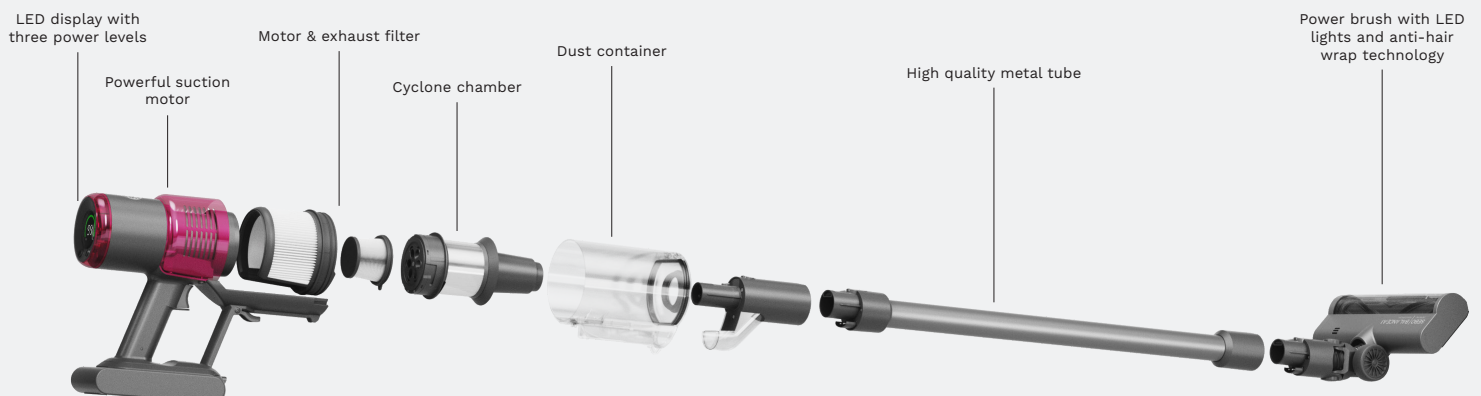

SEBO Power Brush

Designed by SEBO to work effectively on carpet and hard floor, the Power Brush gives excellent pick up of hair and fibre as well as dust, and has an Anti-Hair Wrap feature making it ideal for pet owners. Its low profile lets it get under and around furniture easily and the LED Search Lights mean dirt has nowhere to hide.

Safety Shut-Off

To prevent damage to the working parts of the SEBO Power Brush, it will shut off if the brush roller is blocked.
